Exemple 1

```
class Carte0 extends StatelessWidget {  
  Carte0({super.key});  
  
  @override  
  Widget build(BuildContext context) {  
    return Scaffold(  
      body: Stack(children: [  
        FlutterMap(  
          options: const MapOptions(  
            initialCenter: LatLng(31.63139639931016, -8.01278402883554),  
            initialZoom: 10,  
          ), // MapOptions  
          children: [  
            TileLayer(  
              urlTemplate: 'https://tile.openstreetmap.org/{z}/{x}/{y}.png',  
              userAgentPackageName: 'com.example.app',  
            ), // TileLayer  
          ], // FlutterMap  
        ])); // Stack // Scaffold  
      ]  
    );  
  }  
}
```

MarkerLayer

```
MarkerLayer(  
  markers: [  
    Marker(  
      point: LatLng(30, 40),  
      width: 80,  
      height: 80,  
      child: FlutterLogo(),  
    ),  
  ],  
)
```

Exemple 2

```
final emsiGueliz =const Marker(  
  width: 80.0,  
  height: 80.0,  
  point: LatLng(31.65375468982776, -8.021451299999999),  
  child: Icon(Icons.school, size: 45.0, color: Colors.green)); // Marker  
final emsiCentre = const Marker(  
  point: LatLng(31.631264681786426, -8.0127703503005),  
  child: Icon(Icons.school, size: 45.0, color: Colors.green)); // Marker
```

```
FlutterMap(  
  options: const MapOptions(  
    initialCenter: LatLng(31.63139639931016, -8.01278402883554),  
    initialZoom: 14,  
  ), // MapOptions  
  children: [  
    TileLayer(  
      urlTemplate: 'https://tile.openstreetmap.org/{z}/{x}/{y}.png',  
      userAgentPackageName: 'com.example.app',  
    ), // TileLayer  
    MarkerLayer(markers: [emsiCentre, emsiGueliz])  
  ], // FlutterMap
```
